

ARCHITECT

Vermont Integrated Architecture, P.C. (VIA) of Middlebury, VT seeks an architect or experienced designer with approximately 7-10 years of experience with design and construction documentation for sustainable residential, commercial, and institutional projects. Position requires excellent communication skills, strong proficiency with Revit production of technical drawings, detailed knowledge of building construction and construction documentation and related systems, and experience managing and mentoring designers and junior architects. Must be a team-player and share VIA values with respect to sustainability, community, and design excellence. Experience with Revit, AutoCAD, and Adobe Creative Suite programs required.
